

Jonard's adjustable wrenches are made of chrome vanadium steel and high carbon steel with a chrome plated finish. They are forged and heat treated for maximum strength. Handles are covered with a vinyl grip for user comfort. The knurled worm gear is precision formed and the operation is smooth and trouble free. For accurate and faster adjustments use the metric or English scales on either side of the jaws. With extra wide jaws, a smaller wrench works on bigger jobs. Great for tight spaces. All wrenches comply with ASME B107.8-2003 & ANSI standards. Available kit: AW-6810 Adjustable Wrench Set: 6", 8", & 10" with Extra Wide Jaws. 3-Piece Kit includes: AW-6 Adjustable Wrench 6" with Extra Wide Jaws AW-8 Adjustable Wrench 8" with Extra Wide Jaws AW-10 Adjustable Wrench 10" with Extra Wide Jaws
